

Cloud Delivered Desktops

AT A GLANCE

Dizzion Cloud Delivered Desktops efficiently deliver desktops, workspace and application environments to your users as a cloud service.

KEY BENEFITS

- » **Simple, Efficient Management**
Rapid user provisioning and modifications in minutes, not days. Automated operating system and application updates and patches. View infrastructure, monitoring and reporting from a single pane of glass.
- » **Increased Productivity**
Efficiently deliver hosted desktops and applications as a cloud service, removing the traditional productivity barriers of location, device, and access restrictions.
- » **A Customizable, Secure End-user Experience**
Not a one-size-fits-all service. High-performing, individual or group user experience with over 100 security controls.
- » **Capital Efficient**
Shift your CAPEX to OPEX.
- » **Device Agnostic**
Access via desktops, laptops, tablets, thin/zero clients and even smart phones. Ideal for BYOD and Work@Home programs.

THE DIZZION ADVANTAGE

Dizzion enables companies like yours to eliminate the expense and complexity of traditional desktops by offering a *fully-managed End User Computing platform*.

Call it a hosted virtual desktop, Desktop-as-a-Service (DaaS), or a Cloud Delivered Desktop — it all means the same thing: your users always have access to your most critical applications and information assets, delivered from our highly available and secure data centers.

Dizzion delivers the End User Computing platform performance and reliability your business expects, supported by DizzionCare, our 24x7 white-glove support.

AN ALL-INCLUSIVE HOSTED SERVICE

Cloud Delivered Desktops save on your bottom line by shifting costs from expensive, difficult-to-manage hardware and software investments to a convenient, predictable monthly service model.

Dizzion includes the virtualization software, antimalware, patching, updates, enterprise security, bandwidth, reporting and monitoring. It's simple to scale your deployment: add or remove additional desktops with fluctuations in demand or seasonal requirements.

FEATURES LIST

Customized Solution

- Private Cloud, On-Premise or Hybrid delivery
- Named or Concurrent, and Persistent or Non-Persistent Desktops
- Cloud Burst Desktops provide Business Continuity and Disaster Recovery capabilities using geographically diverse service delivery locations

Highly Available Infrastructure

- Hardened, resilient service provider data centers
- Redundant firewalls, load balancers, and customer / control plane routing and switching
- Redundant server and storage infrastructure utilizing high availability and automated recovery

Enterprise Security & Controls

- Dedicated resource pool (security gateway, connection broker, auth server), IP addressing, VLAN and firewall per environment
- Physical and virtual firewalls with TrendMicro™ Deep Security™ antimalware
- PCoIP encrypted end-user connection (VPN not required)
- PCI-DSS and HIPAA-HITECH physical security certifications
- PCI offerings: IDS/IDP, WAF, Log Monitoring / Inspection, File Integrity Monitoring (optional)
- Dual Factor Auth, Single Sign On and Mobile Device Management (optional)

Unparalleled Performance

- MacBook Pro / Solid-state PC-like end-user experience
- PCoIP (quality of service) tuning ensures optimal application performance
- Softphone telephony integration & real-time video playback support
- Scale out system architecture: platform performance increases as load increases

BACKED BY DIZZIONCARE TECHNICAL SUPPORT

DizzionCare is our commitment to providing your organization with full-time, dedicated technical and strategic support. We've got you covered.

Included:

- Dedicated Account Team (Sales, Solutions and Client Relations)
- 24x7x365 infrastructure support
- Portal/Tools access to support users
- Real-time health display for each desktop
- 100's of metrics monitored and reported via dashboard
- Data Protection
- White-glove onboarding process
- Quarterly Business Reviews
