

Cloud Delivered Desktops for Business Process Outsourcers (BPOs)

WHAT DOES YOUR COMPETITION KNOW THAT YOU DON'T?

In this tight market, your toughest competitors have embraced Virtual Desktops as a way to increase their bottom line and satisfy customers.

Dizzion's Cloud Delivered Desktops can help drive agent productivity, lower your capital expenditures, and increase your customers' confidence in the security and capability of your services.

MAKE VIRTUAL DESKTOPS YOUR MARKET ADVANTAGE.

Increase Your Speed and Profitability

- **Improve your agents' productivity and billable minutes** through rapid system boot times (shave off minutes) and instant provisioning.
- Say goodbye to the traditional customer ramp. **Scale new desktops in hours** with a simple vendor request.
- **Turn over training centers in minutes, not hours**, simply by re-entitling them to a new security group.

Reduce Your Costs

- **Decrease your hardware spend** by repurposing existing endpoints or purchasing less expensive, power-saving thin-clients or zero-clients.
- DaaS delivers instant provisioning, updating and single-pane monitoring. **Agents can access their desktop from any device**, so seats can be used over and over.

Assure Data Security for Your Customers

Dizzion's 100+ control attributes ensure that your customers' data and applications are secure from loss, theft or disaster.

Simply your customer audits, because their proprietary data is safely stored on the server, never on an agent endpoint device. And your assets are protected 7/24/365 from external harm by enterprise antimalware software.

8 REASONS FOR CHOOSING DIZZION

1. We are 100% focused on End User Computing, and we know it best.
2. The monthly cost is fixed and all-inclusive: no hidden costs for bandwidth, licensing, security and support.
3. You can integrate the desktops with Softphone telephony and real-time video training playback support. Ideal for Work@Home or BYOD.
4. DizzionCare means 24x7x365 dedicated support for your IT team from professional virtual desktop engineers.
5. Scale or switch out your customer programs as fast as demand requires. Your operations floor can have multiple client turns in real time, with zero IT intervention.
6. Dizzion delivers a high-performing virtual desktop experience to your agents, comparable to a MacBook Pro or solid-state PC.
7. You get Data Security at all layers, from physical and vFirewalls, to antimalware and PCI-DSS and HIPAA-HITECH physical security certifications.
8. You choose the delivery model: Dizzion secure private cloud or on-premise.

“In the extremely metrics-driven contact center industry, Dizzion represents huge gains for our clients. Dizzion is already adding tremendous productivity gains to our business.”
